

Manicure/ Pedicure clients

- Due to the individual nature of each clients lifestyle/nail strength/ nail health and natural oils within the nail there is no guarantee of how long your gel manicure will last. The average time is 2 weeks, some people can last 5 weeks, some can last a few days.
 - If your gel polish chips or lifts (through no fault of your own) within 7 days of application we will repair them for free.
 - After 7 days from application, repairs are \$15 each
 - We can not repair broken nails or apply any type of extensions
 - Gel polish does not strengthen your natural nails, it simply forms a strong shield over the nails which allows them to grow longer than they would normally. It is not realistic to expect that the length achieved while wearing gel polish will last when the gel is removed.
 - While it is fine to have gel polish applied long term, most clients will experience temporary weakness/ dryness/ peeling of the nails when they stop wearing gel polish. Homecare consisting of cuticle oil and Opi Nail Envy Strengtheners can help restore nail health
 - Standard nail polish is available on request however if the client smudges the polish before it is fully set (allow 2 hours of no touching) there will be a cost of \$10 per nail to repair. Standard nail polish is not covered under the one week warranty
 - Pedicures –While we will do our best to cosmetically improve troublesome nail conditions we are not qualified to fix conditions that would normally be treated by a medical specialist ie – ingrown toenails, thickened toenails, fungal infections, corns, verrucas etc.
-
